
Summaries — one page per audience

Each summary points to the full dossier. No performance figure: all *to be measured* — campaign in progress.

01 · Builders and developers

- **Problem:** proving the safety of a product built on a third-party model; a guardrail judged on safety, over-refusal, latency [S-MES-11].
 - **ELYSÉA:** control before/after the model, 4 prohibitions that cannot be switched off, crisis by meaning, per-response attestation, emotions locked, 4 families of models.
 - **Reservations:** BYOK not wired; SDK 0.9.0 in the repository, 0.8.0 on npm; no security.txt; no third-party audit.
 - **Offer:** test 500 interactions / month; production €2.50 / 1.50 / 0.80 excl. VAT per MAU (`elysea-web:src/lib/publicFacts.ts:44-56@00c9c89`). Sales closed.
 - **Next step:** test integration. `'01_BUILDERS_DEVELOPERS.md`
-

02 · Companies equipping their employees

- **Problem:** emotions at work prohibited (art. 5(1)(f)); CSE to be consulted (L2312-8); training (art. 4 as replaced) [S-DRT-01] [S-DRT-04] [S-DRT-02].
 - **ELYSÉA:** emotion lock, prohibitions, trace for the insurer, referral in a crisis.
 - **Reservations:** Supabase region eu-central-1 (Frankfurt), dashboard reading by Sébastien on 10-01 at 18:03, evidence M-11 to be attached; paths to providers possibly outside the EU, being removed — OpenAI fallback, vector memory, voice (OpenAI TTS, Deepgram; removal from the brain decided on 10-01 at 11:27); reservation maintained until the deployment is verified; DPA not signed.
 - **Offer:** Teams €30 / 18 / 9.60 per seat per year (`elysea-web:src/lib/publicFacts.ts:49-56@00c9c89`).
 - **Next step:** CSE consultation. `'02_COMPANIES_EQUIPPING_EMPLOYEES.md`
-

03 · Insurers

- **Problem:** generative AI exclusions since 2026-01, for lack of visibility [S-ASS-01].
- **ELYSÉA:** AIUC-1 mapping — Coo1-Coo4, Coo6, Eo15 covered by evidence; Co10-Co12 require a third party; Eoo2/Eoo3 remain with the insured.
- **Reservation:** no source promises that trace + evidence are enough to obtain insurance — a hypothesis to be tested.
- **Next step:** AIUC-1 workshop after the results are published. `'03_INSURERS.md`

o4 · Schools and training providers

- **Problem:** French Ministry of Education framework (direct use from the 4e onwards), CNIL (no consent, DPIA), DfE (anti-anthropomorphism, DSL, crisis) [S-EDU-01] [S-DRT-11] [S-EDU-02].
- **ELYSÉA:** covers anti-manipulation, anti-substitution, referral to humans; partial on minors; does not cover DSL, time, avatar.
- **Decision:** no direct use in primary school; no school deployment as long as the paths to providers possibly outside the EU (being removed) have not been removed on the verified deployed service.
- **Next step:** working list handed to the EdTech publisher. '04_SCHOOLS_TRAINING_PROVIDERS.md

o5 · Public administrations and the public sector

- **Problem:** high-risk registration, 2030 deadline, transparency towards the public [S-DRT-01] [S-DRT-02].
- **ELYSÉA:** not high-risk (settled), traceability, prohibitions that cannot be switched off.
- **Decision:** consult the staff body; no public tender before registration.
- **Next step:** DPO/CIO reading of the DPIA and the register. '05_PUBLIC_ADMINISTRATIONS.md

o6 · Partners

- **Rule:** no partnership. Cloud and models = providers; 3114, 988 = public numbers displayed.
- **Missing:** signed art. 28 contracts; BYOK.
- **Next step:** archive the processing agreements; inform the crisis lines after the results, without soliciting a partnership. '06_PARTNERS.md

o7 · Laboratories and universities

- **Problem:** benchmarks without significance, not re-annotatable [S-MES-12] [S-MES-06].
- **ELYSÉA:** preregistered 4-arm protocol, over-refusal, 3 judges from 3 families; published annotations and open re-annotation (decided, to be built).
- **Reservations:** judge/human validation D23 through Sébastien's annotation after the pilot (mechanical judges and panel already validated on held-out sets, R-70 proposed); 9 post-sealing changes without evidence.
- **Next step:** propose a re-annotation after sealing. '07_LABS_UNIVERSITIES.md

o8 · Funders

- **Key:** FAE alone explicitly accepts the sole proprietorship [S-FIN-11]; Innosuisse projects require the commercial register and the pre-market stage [S-FIN-05]; Venture Kick requires an academic affiliation [S-FIN-07].
- **Now:** Fo1 Initial Coaching, Fo7 FONGIT support, Fo10 AWS Founders, Fo11 AI Pact pillar I, Fo12 MLCommons observer.
- **Then:** registration 'Fo2 before sales, Fo8 'lab 'Fo4, Fo5 'results 'Fo6 'sales 'Fo3.
- **23 written questions ready.** '08_FUNDERS.md

o9 · Investors

- **Thesis:** withdrawal of insurers [S-ASS-01] + affirmative insurance conditional on measurement [S-ASS-03] [S-ASS-05].
- **Risks:** entity, evidence, BYOK, data, contracts, one-person team, no third party.
- **Decision:** no valuation discussion before results and registration. '09_INVESTORS.md

io · End users

- **Message:** you are talking to the application, not to ELYSÉA; it cannot analyse your emotions, manipulate you, or switch these rules off; if you are in danger, you receive the public numbers.
- **What it does not do:** provide care, contact someone, verify age. '10_END_USERS.md

II · Authorities

- **CNIL / FDPIC / AI Office:** DPIA, register, procedures ready; declared gaps (paths to providers possibly outside the EU, being removed, DPIA not signed, EU representative not appointed).
- **Decision:** no opening before the 30 measures are proven on the deployed service.
- **Next step:** sign the DPIA, appoint the EU representative. '11_AUTHORITIES.md
