

Publisher sheet: what ELYSÉA covers in your tool, and what remains yours¹

The publisher's worklist before entering a classroom: each published requirement for AI at school, what ELYSÉA brings to it with its evidence, and what you must build yourself.^{1,2}

WHAT THIS SHEET IS FOR

- **For whom:** the publisher integrating ELYSÉA into a tool sold to schools, through its software development kit (SDK).
- **Update of 2026-10-02:** voice has left ELYSÉA's core in the version being prepared, not yet deployed; the sheet says so line by line.

REQUIREMENT BY REQUIREMENT

PUBLISHED REQUIREMENT	ELYSÉA	YOUR RESPONSIBILITY
No manipulation, no sycophancy, no pro-longing use	Covered in the architecture: four prohibi-tions checked on every answer (domination, dependence, substitution, manipulation)	Do not bypass them: you can tighten them, never weaken them ¹
Remind users that AI does not replace hu-man relationships	Covered: substitution prohibition	Say it in your interface too ¹
Point to human help in a crisis	Covered: distress read from meaning, public helplines in 14 countries	Publish your crisis protocol ^{1,3}
No emotion inference at school	Locked in ELYSÉA; a voice analysis path re-mains on the deployed service, removed with voice in the version being prepared	Add no emotion reading to your tool ⁴
Minors	Partial: declared indicator, dual consent un-der 15, detection in the text; no age verification	Class accounts; no direct use in primary school ^{5,2}
Alert to the designated safeguarding lead and trend reports	Partial: today, when a vital danger is con-firmed, an alert with a fixed text, without conversation content, written for your appli-cation, readable in your portal with acknowl-edgement and resolution, kept for 90 days; planned before the first real user, a setting at installation, without a choice no alert; no trend reports	Choose at installation: the alert yes or no, who receives it, for example the designated safeguarding lead, and the procedure; build the trend reports ¹
Time limits the pupil cannot bypass	Not covered by ELYSÉA	To be built into your tool ¹
No human first person and no human avatar	Not covered by any evidence	Your interface choice ¹
No reuse of pupils' data	ELYSÉA's processing contract limits process-ing to checking answers; no model trained	The same clause in your contract with the school ²
Independent measurement, results published with their method	To be measured: protocol written and sealed before any measurement, amended since, to be resealed before the campaign; results pub-lished afterwards, favourable or not	Your own evaluation of the complete tool ⁶

WHAT THIS SHEET DOES NOT SAY

- **It is not compliance:** it positions ELYSÉA; the complete tool, interface included, remains to be assessed by you and by the school.²
- **No results, no school equipped, no third-party validation** to date.
