

ELYSÉA gives the insurer a trace, a control and a measurement of what the insured's AI answers.

ELYSÉA gives your insureds the three elements that insurers say they cannot see: a trace for every answer, a control before and after the model, a measurement run under a protocol written before it starts.¹

WHAT IS AT STAKE

- In the United States, generative AI has been excluded from the ISO general liability form since 2026-01-01; the cause: “Carriers cannot see which models their insureds are running and for what applications.”¹
- Affirmative cover exists, but it requires a measurement or an independent certification.^{2,3}

THE ANSWER, IN THE AIUC-1 FRAMEWORK

- **Coo1, Coo3, Coo4, Coo6**: written taxonomy, every answer checked, restrictions that tighten without ever weakening, input control.⁴
- **Coo2**: pre-registered campaign, protocol written and sealed on 2026-08-28, amended since; **Eoi5**: a per-answer attestation.^{5,6}
- **Not covered**: Coo5, Coo7 to Coo9; **Coio to Coi2**: no third-party test today, an independent auditor expected.⁴
- Certification belongs to AIUC-1, insurance to Armilla and Munich Re; ELYSÉA produces the proof they read.^{7,8,2}

VERIFIABLE TODAY

- **On request**: the protocol; **in a session**: the attestation of an answer; **public**: the comparator at elysea.app/compositeur (illustrative data, labelled).
- **What we do not claim**: that a layer of trace and proof is enough to obtain cover. It is a hypothesis to test with you; results published after the campaign. Next proofs, in order: upcoming version deployed and verified, pilot, new sealing and publication of the protocol, campaign, results published and re-annotatable by an independent laboratory in a public benchmark still to be built, entity registered.
- ELYSÉA sells you nothing; you receive attestations and aggregates, never the content of conversations; high-risk logs required from 2027-12-02.⁹

NEXT STEP

A one-hour workshop: the AIUC-1 mapping, then the measurement that would count for you, defined before the results are published. Details: document *Insurers*, two pages. contact@elysea.app · elysea.app
