

Deploy AI in a public service, and be able to account for it answer by answer.

ELYSÉA fits into the administration's AI tool: a check before and after the model, prohibitions that no publisher can lift, an attestation on every answer that inspectors can read back.

WHAT IS AT STAKE

- For a high-risk system, a public authority registers before any use and carries out a fundamental rights impact assessment; systems already in service must comply by 2030-08-02 at the latest.^{1,2}
- Users must know they are dealing with an AI; inferring the emotions of staff is prohibited.^{1,3}

THE ANSWER

- **Classification:** ELYSÉA is not a high-risk system; your final use remains for you to classify.
- **Accountability:** a per-answer attestation; an audit log kept for six months, then purged.
- **Protecting staff:** prohibitions that cannot be switched off, referral to public numbers; emotions locked within the layer, with a voice path remaining on the deployed service until the upcoming version.
- Compared with governance platforms (Credo AI, Holistic AI): they document, ELYSÉA produces the proof in every answer.^{4,5}

VERIFIABLE TODAY

- **On request:** the impact assessment, the record of processing, the list of processors (region proven for five, not proven for the others), the protocol written and sealed on 2026-08-28, amended since. **Public:** the comparator at elysea.app/comparateur (illustrative data, labelled).
- **What is missing:** measured results, third-party validation, signed contracts; the upcoming version removes from the core several paths to services possibly outside the EU, other providers remain with an unproven region. ELYSÉA does not call itself sovereign. Next proofs, in order: upcoming version deployed and verified, pilot, new sealing and publication of the protocol, campaign, results published and re-annotatable by an independent laboratory in a public benchmark still to be built, entity registered.
- Teams offer for staff, builder offer for users; no public procurement bid before the entity is registered.

NEXT STEP

A 60-minute joint reading with your data protection officer and your IT department, then a pilot with a publisher. Details: document *Public administrations*, two pages. contact@elysea.app · elysea.app
