

ELYSÉA gives AI applications the trace, control and proof their insurers say they cannot see.¹

ELYSÉA is an ethical cognitive infrastructure, embedded through an integration kit (SDK) between an application and the AI model: control before and after the model, four prohibited behaviours, one attestation per answer.

THESIS

- Insurers are withdrawing for lack of visibility; affirmative insurance exists, conditional on measurement. Our hypothesis, not proven: trace, control and proof make a deployment insurable; the campaign is designed to test it.^{1,2,3}
- **Market, open sources:** in 2025, 19.95% of EU enterprises with ten or more employees use AI, 55.03% of large ones; no market size in euros is put forward for this layer. AI Act enforcement since 2026-08-02.^{4,5}

PRODUCT, COMPETITION, ROADMAP

- Control before and after the model, prohibitions that cannot be switched off, crisis read by meaning, per-answer attestation; today on ELYSÉA's own model, the customer's key (Mistral, OpenAI, Gemini, Claude) being planned, not yet enabled.
- Compared with content classification (Llama Guard 3, ShieldGemma) and configurable guardrails (NeMo Guardrails, Bedrock Guardrails): a baseline that cannot be switched off, and proof for every answer.^{6,7,8,9}
- Steps, with no date promised: upcoming version deployed, pilot, new sealing, campaign, results published, entity registered, sales.

VERIFIABLE TODAY, AND WHAT IS MISSING

- **Public:** the comparator at elysea.app/comparateur (illustrative data, labelled). **On request:** the code, the protocol written and sealed on 2026-08-28, amended since. **Decided, to be built:** the public benchmark.
- **Missing:** the entity, the results, the customer's key, the deployed removal of the core's non-EU paths, signed contracts, a third-party validation. One founder, Sébastien Sanna; no revenue.
- **Model:** usage per active user, from €2.50 to €0.80 excl. VAT per month, no subscription; Teams seats from €30 to €9.60 per year; margin not established. Compliance: not high-risk, impact assessment not signed.

VALUATION AND NEXT STEP

No round is open, and no valuation will be discussed before the results and the registration of the entity. A 45-minute conversation on the thesis, then the results when they are published. Details: *Investors* document, two pages. contact@elysea.app · elysea.app
