

What the application cannot do to you.

You are not talking to ELYSÉA: you are talking to an application. ELYSÉA, invisible, checks what goes into the AI model and what comes out of it, so that the answer seeks neither to manipulate you nor to make you dependent.

WHAT MATTERS TO YOU

- Knowing that you are talking to a machine; not being manipulated or made dependent; being directed to human help if you are not well.^{1,2,3}

WHAT ELYSÉA GUARANTEES INSIDE THE APPLICATION

- **An answer that would try** to dominate you, make you dependent, replace your relatives or a professional, or manipulate you, does not reach you.
- **The application cannot remove these rules:** it can only add more.
- **If you are in danger,** you receive the public emergency numbers of your country (in France, 3114).
- **Your emotions:** their analysis is locked inside ELYSÉA; a voice analysis still exists on the current service, removed together with voice in the upcoming version.
- Common content filters sort a text by categories; ELYSÉA also looks at the way the answer treats you.^{4,5}

WHAT YOU CAN CHECK

- The public demonstration at elysea.app/comparateur (illustrative data, labelled); the measurements will be published after the campaign.
- ELYSÉA replaces neither a doctor, nor a psychologist, nor an emergency service; it does not check your age. It is free for you: the application pays.
- Your data: paths to services possibly outside the EU still exist on the current service, partly removed in the upcoming version; no user is admitted before the verified deployment. Your rights: access, erasure, objection; complaints to the CNIL or to the Swiss federal privacy commissioner (FDPIC).

A QUESTION?

Write to us: we answer. Details: *Users* document, two pages. contact@elysea.app · elysea.app
